

## THE CREATION summarised

**1. the state of the world is an expression of human consciousness.**

**2. the state of human consciousness and the state of the world change from perfectly clear/harmonic to chaos.** I like to describe the process of **energy decrease/transformation** with the term "**entropy**" (from order to chaos). It means an observable process: all matter goes from new to old, the house used to be new and becomes old, the car used to be new and becomes old... This "loss of energy" also happens to the human soul (consciousness) in the world of matter, to the extent that it **identifies itself as a SPIRITUAL being with matter, its body** ("I am the body and have a soul instead of "I am the soul and have/use a body as an instrument"). **CAUSE/Creator/Soul and EFFECT/Creation/Body WERE CONFUSED.** Thus the soul subjected itself unconsciously to the "loss of energy" of matter.

**3. the conscious soul-spiritual purification of human beings towards a clear divine consciousness must therefore precede the clearing of the physical world.** The "descent" takes a long time, the consciousness ascent relatively short; **the time of ascent/transformation is NOW.** We are living in the transition from the old world to the new world.

**4. the clearing of human consciousness also has a purifying effect on the physical plane of creation according to the spiritual law "As above - so below".** A total destruction of the earth does not take place. Relatively few transformed people ensure the transition into the new time, after they have previously achieved a new pure consciousness **with God's teaching, love, energetic help and their own efforts.** The majority of souls go into the "resting place" of the soul world, also called the world of "salvation". In accordance with the increase in population, the souls then incarnate again, in each case when they fit in energetically.

**5. the new consciousness is free from disturbance; it is characterised by deep altruistic love, joy, happiness, harmony as well as deep inner and therefore also outer peace,** etc. This is the new earth, the Golden Age. It is emerging in India. India is originally called **Bharat.** **Paradise** sounds similar, because both have the same root.

**6. Creation is therefore NOT a creation out of nothing, but always a new creation, a regeneration, or, if you like, a RESET, a return to the "state of delivery". From this follows: It is a CLOSED CIRCULATION of time.** The idea of a cycle is much closer than the theory of evolution (from nothing to nothing), especially since nature knows many cycles, such as the water and blood cycles as well as the planetary cycles.

**7. The closed nature of the cycle refers to an infinite number of identical cycles.** Thus recognition is always recognition, such as déjà vu or visions of the future. Language is also full of clues: Discovering (freeing something hidden, already present from the covers) etc.

**8. What role does GOD play?** God never intervenes directly in physical creation. **He Regenerates human consciousness and the renewed human consciousness renews the world.** In this regard, I refer to my YouTube lecture entitled "THE CREATION IN CONNECTION WITH THE QUANTUM FIELD", which I gave in Cambridge and Zurich a good two years ago:
